# SoCS<sup>•</sup> 4 2014 Symposium on Computational Sustainability

November 26-28, 2014 Görlitz, Germany

The 2014 Symposium on Computational Sustainability (SoCS'14) brings together researchers, students, users, and practitioners interested in different aspects of sustainability and IT.

Computational Sustainability is an emerging area that aims to apply techniques and methods from computer science and related disciplines (e.g., information science, applied mathematics, operations research, and statistics) to help manage the growing need of sustainable processes and products in the globalized economy.

#### Program

Day 1: Technical Talks, 4th SITA Meeting, Social Event

Day 2: Industry Seminar on Corporate Sustainability

Day 3: Workshop on Sustainable IT Services

# Organizers

Jörg Lässig Markus Ullrich Waheed Aslam Ghumman University of Applied Sciences Zittau/Görlitz
